NOVELTY DANCE DRAWS BIG CROWD

The dance in the Farmers Exchange hall on Tuesday night was well patronized and a large number were present from the surrounding towns. The hall was prettily decorated for the occasion in the Elks colors, purple and white, and many Japanese lanterns were seen hanging over the lights. The local orchestra provided excellent music for the occasion and real peppy music was the result. The supper provided was also of the best and ample refreshments were provided. In other words the dance was all that it was advertised to be, "The Biggest and Best of the Season." A feature which attracted considerable attention was the display of novelties such as hats, caps, fans and streamers of all descriptions, while a balloon dance was probably the outstanding feature. On this occasion the Elks lived up to their reputation of putting on a real dance. The proceeds went towards the proposed Elks Community hall.

MARCH 14th, IS DECIDED AS DEFINATE DATE FOR PLAY

The evening of Thursday, March 14, has been definitely decided as the date which the play "Civil Service" will be staged in the Farmers Exchange Hall. Watch for the posters for full particulars of this comedy drama.

In our last issue we published part one of the story of the play. For the benefit of our absent-minded readers we reprint this part and also part 2 of the story is published.

Story of the Play (Part 1)

A comedy drama of American life depicting the joys and sorrows, the heartaches and struggles and temptations of a small group of government employees working in a small city in the West. There is the stern inspector, the officious postmaster, the busy body mail clerk, the ambitious young clerk who yields to temptation and robs the postoffice, the raw recruit and the noble hearted, plucky little stamp clerk, who bravely stifles her own feelings and lives for the advancement of her friends.

(Story of the Play, Part 2)

Steve Aulaine, the hero of the play, has been living beyond his means and is deeply in debt. He steals two fifty dollar bills from a letter, but soon repents his rash action. The postoffice inspector arrives hot on the trail of the thief. Just as Steve's guilt has been established "Old R.F.D.," a kind hearted old man, the rural free delivery carrier, comes forward and assumes the guilt. Years before he has robbed the mails and was sentenced to serve fifteen years in the penitentiary. When he was sent to prison he had a baby boy, but when released was unable to find him. He now discovers that Steve is his son and resolves to keep him from following his fathers footsteps. The father-love prompts the self sacrifice and makes him happy in giving his boy all he has in this world to offer—his liberty. But through the pluck and sagacity of Kate Kenyon, the little stamp clerk, neither Steve nor his father are required to suffer the penalty of Steve's rash action. All ends happily and Steve and Kate and old R.F.D. (with his faithful old mare, Bess) go out on a homestead in British Columbia to begin a new life free from temptation and care and out of the bonds of Civil Service.

The weather the past week has been very mild and it won't be long before spring.

OMMITTED FROM THIS ISSUE

A report on the school fair meeting, which was held last Saturday, was to have appeared in this issue, but this was not received up to the time of going to press and if possible, this will appear next week.

LITTLE ITEMS OF LOCAL INTEREST

Among those who have purchased one of the new Chevrolet cars from S. J. Garrett's Garage are Messrs. Wm. Talbot, J. J. Bertsch and Const. Morlarty.

An Auction Sale of household effects will be held at the home of Mrs. A.E. Buffan on Saturday afternoon, March 2nd, at 2 p.m.

Mr. and Mrs. Gus Bitz left last Friday for Hanna to attend the funeral of Mrs. Bitz's aunt. They returned on Tuesday.

R. J. Fairbairn, who is suffering from a severe attack of pneumonia, is reported to be getting along about as well as can be expected.

J. J. Greenan is a Calgary visitor this week, going on Tuesday.

Mr. McLeod has resigned his position as manager of The Builders Hardware Stores Ltd. and the new manager, Mr. G. Ramsay, has taken over command. Mr. McLeod left for Calgary on Sunday, but Mrs. McLeod will remain here till spring.

The Farmers Bonspiel is attracting considerable attention at the rink and many from the country have been enjoying the game in the afternoons.

PROPER HITCHES EXPLAINED

Great West Saddlery Issues Booklet of Use to All Horse Users

All farmers using horses to supply farm power will find some valuable advice on hitches and equalizers for teams of four to twelve horses in a pamphlet recently issued by the Great West Saddlery Co. Edmonton Office. Details of the most effective hitches for all sizes of teams are shown by diagrams and photographs.

The booklet has been compiled with the assistance of some of the outstanding university extension departments on the continent and includes comparisons of horse power and utility with power machinery. As measurements are given for lengths of equalizers so that the proper division will be made among all horses when large teams are used, the booklet should prove of great value to all farmers who employ horses.

A copy of this booklet may be had on application to W. A. Braisher, at Carbon, Alberta.

72 BALLOTS CAST IN DIVISION TWO

ED. SCHELL ELECTED TO MUNICIPAL COUNCIL

The election in Division 2, of the Carbon Municipality, which was held last Saturday, resulted in Ed. Schell being elected to take the place of J. J. Neher on the Municipal Council this year. The election was very close and in all 72 ballots were cast. Ed Schell securing 37 of these while his opponent, John J. Neher received 35 votes.

Mr. Neher has been a member of the Municipal Council ever since the Carbon Municipality was formed, over seventeen years ago and in retiring a very valuable councillor will be lost, but all hope that his place will be ably filled by his successor, Edward Schell.

The 1929 council will now consist of S. N. Wright, Ed. Schell, W. H. Levins, C. G. McMann, R. S. Neay, G. H. Webber, and O. M. Grieve.

POOL ELEVATOR PROGRAM

A tentative list of points at which the Alberta Wheat Pool will build or buy elevators during the coming season has been issued from the Pool Office. The total number of points is fifty-six, but the list, it was pointed out, is by no means a final one.

The Alberta Pool has now 315 elevators located at country points, and the additions will bring the total number up to 374. The list may be enlarged considerably as the season develops, but the increase will depend upon various factors.

The number of elevators which will be built and the number purchased will depend on the prices asked by elevator companies for elevators they are willing to sell, and also on the price of lumber.

Whether the Pool decides to go into a new place it is usual for the organization to make an offer to purchase if there is an elevator there which will meet the requirements. In this way the Pool has acquired a considerable number of houses and avoided a wasteful duplication.

A number of points are under consideration for a second Pool house because of the extraordinary large deliveries of Pool wheat, but a definite decision as to these has not as yet been reached.

TOOK SODA 20 YEARS FOR GAS—STOPS NOW

"For 20 years I took soda for indigestion and stomach gas. One bottle of Adlerika brought me complete relief."—John B. Hardy.

Adlerika relieves gas and sour stomach at once. Acting on BOTH upper and lower bowel, it removes old waste matter you never thought was in your system. Let Adlerika give your stomach and bowels a REAL cleaning and see how good you feel! Overcome constipation.—A. F. McKibbin, Druggist.

HOW TO HITCH HORSES FOR CHEAPER FARM POWER

All Farmers interested in making farming a paying proposition should call at my Store and ask for my Booklet on the above subject. This is part of the free service which I intend to give this year.

Power and Its Dangers

Down through the ages man has striven for power, and yet more power. From the biblical story of creation we learn that man was given power and dominion over the beasts of the field, and thus early in his career set out to establish his power over all the forces of nature. From that time down to the present with ever increasing eagerness and energy man has sought for power.

It is recorded of Alexander the Great that, having conquered the then known world, he sighed for more worlds to conquer. Egypt under the Pharaohs, Rome under the Caesars, Carthage, Greece, all the great empires of the past strove for power, and, having attained it, were ultimately destroyed by it. The same was true of Napoleon, and in the lifetime of the present generation it has again been proven in the case of the ex-Kaiser Wilhelm.

By way of contrast the history of Britain during the last one thousand years may be noted. The British Empire is today the most powerful political entity in the world. It has gone on from strength to strength and increased in power, not through the autocratic use of its power, but, by a paradox, in continually and voluntarily relinquishing powers which it enjoyed to subordinate peoples and colonies, raising their status, conferring new powers on them, and accepting them on terms of equality with itself. The most dangerous period in Britain's history was when it did not pursue such a course and sought to impose its will upon the thirteen American colonies. At that time instead of gaining or retaining power, it lost it. That lesson has never been forgotten by British statesmen.

Power wielded wisely will increase, but exercised unwisely and autocratically it will destroy itself. This is just as true in the case of individuals, corporations and associations as it is in the case of rulers, governments and countries. It is especially true of monopolies of all kinds, and it is because monopolies have and do make use of their power unfairly and selfishly that there has developed such a large body of public opinion favorable to the principle of public ownership and operation of all services which in their very nature must be monopolistic, as, for example, railways, telephones, electric power systems.

In the early days of Western Canada the C.P.R. enjoyed a monopoly in transportation. It was rather autocratic; perhaps in those days it had to be, but its management was wise and far-seeing, and, in later years, using its great power for the good of the country, it has grown still more powerful and successful, and, at the same time, stronger in the esteem and goodwill of the people.

The organized grain trade of Canada wielded great power, but, not being so amenable to public opinion, it has lost much of its power. It is still inclined to be selfish and in that fact lies its danger, because it cannot be denied that it is losing instead of gaining in public favor, with the inevitable result that year by year it is being hedged about with greater restrictions and a larger measure of public control.

The same danger confronts the great banking institutions of the country, and the people are becoming increasingly restive under the steady absorption of small banks by the larger ones. The banks may, for the time being, become more powerful, but there is always a greater power, the people themselves, and the banks may succeed in becoming so consolidated and powerful, that it will become all the simpler for the people to step in and take their powers to the nation itself.

In this electrical age, water powers, coal resources, and electrical distribution systems are the very life-blood of industry. Upon them is dependent most of the conveniences of modern life. Control of electrical development means great power, both directly and indirectly. Financial magnates and captains of industry are fully alive to this fact, and there is keen competition throughout the world, and especially on this continent, to obtain such control. It means power in a double sense. It is the live question in the Dominion Parliament, the Manitoba Legislature, the Alberta Legislature now in session, as it was the outstanding question before the Saskatchewan Legislature recently prorogued. It is the biggest issue in Ontario and Quebec, and the outstanding problem at present affecting the relations of Canada and the United States.

In Ontario the controlling factor are the people themselves through their Provincially-owned system. The Saskatchewan Government has adopted the same policy. But unfortunately the situation is not so satisfactory in Manitoba and Alberta. And now come reports that United States interests are seeking to secure control of Canadian companies operating in the west, which would have the effect of bringing this country within the tentacles of the big American Power Trust.

Sour Stomach

Just a tasteless dose of Phillips' Milk of Magnesia in water. That is an alkali, effective, yet harmless. It has been the standard antacid for 50 years among physicians everywhere. One spoonful will neutralize at once many times its volume in acid. It is the right way, the quick, pleasant and efficient way to kill the excess acid. The stomach becomes sweet, the pain de-

parts. You are happy again in five minutes. Don't depend on crude methods. Employ the best way yet evolved in all the years of searching. That is Phillips' Milk of Magnesia. Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. Each bottle contains full directions—any drugstore.

No Time For Train Travel

Lindbergh Finds Airplane Best Way To Get Around

When Col. Lindbergh set out in the first week in February in a flight to inaugurate the air mail service between Florida and the Canal Zone, he was asked how long it had been since he had travelled in a railroad train.

"More than a year and a half—before I flew to Paris," he replied.

Since he learned to fly, Col. Lindbergh, up to the time of the Florida-Panama flight, had covered 270,000 miles in flight. This distance is equal to about eleven times the circumference of the earth. The time he had spent in the air totaled 3,030 hours, or about four months off the ground. In 1928 he was 800 hours in the air, or more than thirty-three days. In this time his flights totaled 65,000 miles.

"I wouldn't have time to go so many places if I didn't fly," he said.

Fine Cough Remedy

Druggists Will Observe Buckley's Cough Mixture Week

The week of February 28th to March 6th, is being observed by the retail druggists of Canada as "Buckley's Cough Mixture Week."

This week has been arranged by the Retail Merchants' Association of Canada and the Provincial Boards of the Retail Merchants' Association, in co-operation with Messrs. W. K. Buckley, Limited, the manufacturers. This product has been on the market for many years and because of its rapidly increasing favor with Canadians during the last few years. "The Week" is being featured this season to focus additional attention on this fine cough remedy.

Toes Made Comfortable Sore Corns Removed

Quick, safe relief is almost instantaneous if you apply PUTNAM'S CORN EXTRACTOR. Shoes won't pinch or hurt. One single drop of Putnam's stops the pain. A few applications make the corn dry up and drop off. Putnam's Corn Extractor gives satisfaction. Thousands use it every day. Get a bottle from your druggist. Refuse a substitute for "Putnam's" the one sure relief for sore corns.

A race of people in India believe that all elephants have two trunks, three eyes and ten legs in the land to which elephants go after death.

A PERFECT MEDICINE FOR LITTLE ONES

Baby's Own Tablets Should Be In Every Home Where There Are Children

The perfect medicine for little ones is found in Baby's Own Tablets. They are a gentle but thorough laxative which regulate the bowels, sweeten the stomach; drive out constipation and indigestion; break up colds and simple fever and promote healthful and refreshing sleep. It is impossible for Baby's Own Tablets to harm even the new-born babe as they are absolutely guaranteed free from opiates or any other injurious drugs. Concerning them Mrs. Earl Taylor, Owen Sound, Ont., writes:—"I have four children and have always used Baby's Own Tablets. I am never without the Tablets in the house as they are the best medicine that I know of for little ones."

Baby's Own Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Arizona and New Mexico are the youngest states, having been admitted into the Union in 1912.

A Prime Dressing For Wounds.—In some factories and workshops carbolic acid is kept for use in cauterizing wounds and cuts sustained by the workmen. Far better to keep on hand a bottle of Dr. Thomas' Electric Oil. It is just as quick in action and does not scar the skin or burn the flesh.

It is estimated that a person at the height of 5,000 feet can see approximately 90 miles on a clear day.

If one be troubled with corns, he will find in Holloway's Corn Remover an application that will entirely relieve suffering.

It takes 17 days to deliver a letter from London to Cape Town.

Minard's Liniment for the Grippe and Flu.

W. N. U. 1774

ACHING JOINTS

If you ever have rheumatism, lumbago or other pains that penetrate to the very bones and joints, Aspirin offers such quick relief, and such complete comfort that it's folly to suffer. Keep these tablets handy in the house; and carry them in your pocket. Then you need never suffer long from any attack of neuralgia, neuritis, rheumatism, or from a bad headache. Aspirin is always a marvelous antidote for all pain and has no effect on the heart. Proven directions for many valuable uses in every box of genuine Aspirin. Every druggist has it.

Aspirin is a Trademark Registered in Canada

Alberta Potato Growers

A New Market Is Opening Up In the Southern States

Southern Alberta potato growers have a new market opening up in the southern states, according to M. L. Freng, district agriculturist, who pointed out that while Montana was quite a source of supply in this direction, the south was beginning to look to Alberta for first class certified potatoes. An organization has been formed in Edmonton to foster this trade with the aid and approval of the Provincial Government.

Use Minard's Liniment for the Flu.

Effective Talk

If we had talked of preparing for peace in time of peace as long as we have of preparing for war in time of peace, the nations of the world would not be laboring, as they now are, under the burden of billions in taxes every year for armament.

What He Must Know

A young farmer can get along very well without a knowledge of Latin or Greek, but to succeed he must know something of soils, of pests, or fungous diseases and a dozen other subjects that confront him every day. Education is necessary, but not the kind that education speaks of as disciplinary; hard knocks and adversity will accomplish that.

RICKETS

Children with weak bones or poor dentition receive great benefit from the use of

Scott's Emulsion

It is wonderfully pure, vitamin-rich cod-liver oil and helps build a strong, healthful body, sound bones and teeth.

Scott & Bowne, Toronto, Ont. 25-66

Cut Down Food Wastage

---by covering all perishable goods with Para-Sani Heavy Waxed Paper. Para-Sani moisture-proof texture will keep them fresh until you are ready to use them.

You'll find the Para-Sani sanitary knife-edged carton handy. Or use "Centre Pull" Packs in sheet form for less exacting uses. At grocers, druggists, stationers.

HUNTER-MARTIN & CO., REGINA, SASK.

CONSTRUCTION OF A NATIONAL HIGHWAY URGED

Ottawa.—The railway terminals situation in Montreal must be faced "and faced in a rather large way in the very near future," Hon. Charles A. Dunning, minister of railways and canals, informed the House of Commons. The minister was speaking during debate on the resolution of D. F. Kellner, (U.F.A., Athabaska), which calls upon the government to consider making a further federal grant for the next five years' highway construction.

Mr. Dunning drew attention to the fact that Canada was the owner of a large railway-transportation system, and that its needs must be considered when large expenditures from the federal treasury on highways were contemplated. He did not want himself placed on record as being opposed to the construction of a national highway.

"But I do say, we must always have regard to our over two billion dollar investment on railways in providing for the development progressively, over a period of years, of a form of transportation which will tend to reduce possibility of our railways earning their own way," warned the minister.

Mr. Dunning stressed the point that the provinces themselves prefer increased subsidies to grants which are earmarked for some specific purpose, such as highway construction. They were opposed to government grants with strings attached.

Later debate was productive of an amendment from A. M. Carmichael (Progressive, Kildersley), which favored the construction of a national highway from coast to coast as soon as possible.

The majority of speeches favored federal aid in the construction of highways. The advantages which would accrue to the Dominion through increased tourist traffic, and the additions to the federal treasury because of the purchase of more motor cars, were mentioned as arguments for the resolution.

E. J. Garland (Progressive, Bow River), said that nothing would serve as well as a national highway to bring the east and west together. It was repugnant to think that in crossing the country by automobile, it was necessary to travel part of the way in the United States on account of the roads.

"There is not a prairie member," Mr. Garland declared, "who has not experienced a thrill by the sight of a motor car with a Quebec or better still a Nova Scotia license."

Dr. T. E. Kayser (Progressive, Ontario), said the great need of the west was communication by good roads. He favored the resolution.

David Spence (Conservative, Parli-dale), said he noticed that support of the resolution was only coming from his side of the house.

The members of the opposite side," Mr. Spence said, "especially the members from Saskatchewan, are sitting there as if puzzled."

In his opinion, good roads were a national welfare.

Radio Plans Completed

League Of Nations Will Conduct Broadcast Trials In March

Washington.—The radio commission has received a communication from the secretariat of the League of Nations through the state department, announcing plans of the League to conduct short wave broadcast trials in March to Canada, the United States, South America, Japan and Australia.

Speeches of general interest to the world will be broadcast. The broadcast to America will be conducted on March 12, 19 and 25. "TOLL" is the league station and it uses a wavelength of 18.4 metres.

Ratifies Sale Of Railways

Edmonton.—After a debate lasting through one afternoon and part of another, the provincial government-owned railroads of Alberta passed into the control of the Canadian Pacific and Canadian National railroads and the Alberta legislature lost one of its greatest bones of contention.

W. N. U. 1774

Will Not Issue Invitation

But British Government Is Still Considering Naval Conditions

London, Eng.—Replying to a question, Sir Austen Chamberlain, British foreign secretary, told the House of Commons that the government had no intention of issuing invitation to a new conference on naval disarmament.

Sir Austen re-affirmed a previous announcement that "all questions, concerning British relations with the U.S. and the naval conditions of the two countries are under consideration by the British Government."

"Our examination of this is being diligently prosecuted," he said. "As soon as it is concluded the first step will be to communicate with the Dominions."

The foreign secretary said the recent statement on disarmament in Washington made by Sir Esme Howard, the British Ambassador, was not made on the instructions of the British Government.

Require More Radium

Small Supply Handicaps Toronto Doctors In Cancer Treatments

Toronto.—Effectual treatment of cancer in Toronto, other than by surgery, is materially retarded by the small supply of radium available, declared Dr. Herbert A. Bruce, professor of clinical surgery, University of Toronto, in the course of a paper delivered before members of the Academy of Medicine.

Toronto's whole supply of radium, the speaker said, consisted of the small amount of one-half gram, or about \$25,000 worth. The least amount necessary to successfully carry on a battle against the disease would be two grams, he added.

He suggested collecting a \$500,000 fund which could be used for the purchase of nine grams, an amount sufficient to enable local surgeons to effect many more cures in cancer than is now possible.

Suggests C.P.R. Branch Line Into The Pas

Move Launched By Head Of Ross Navigation Company

The Pas, Man.—A move to have the Canadian Pacific Railway build a line into The Pas, was launched here, when Harvey Weber, president of the Ross Navigation Co., and president of Transports, Limited, urged the Rotary Club to take the initiative.

Mr. Weber advocated asking the C.P.R. to build down the Carrot River Valley to The Pas, and secure joint running rights over the Hudson Bay Railway. He declared numerous prairie towns south and west of here served exclusively by the Canadian Pacific Railway would thereby get one through freight rate to Churchill instead of two rates.

Canada's New Destroyers

Details Are Completed For First War Vessels Ordered By Dominion

London, Eng.—Commodore C. W. Rose, director of naval services of Canada, will return to the Dominion on the steamship Montclare, sailing for St. John, N.B., having concluded the final details for the two new destroyers for Canada.

The destroyers, to be completed in two years, are of the latest British destroyer type of 1,330 tons, speed 37 knots and armed with four 4.7-inch guns and two two-pounder guns. They are the first war vessels ever ordered by Canada.

May Get Permit

Washington.—Bert Acosta, whose pilot's license was revoked by the commerce department last June, may be granted a new permit, but cannot use it until April 18. Acosta conferred here with assistant secretary of commerce MacCracken, and was advised to appeal to the department for withdrawal of two \$500 fines for violation of air regulations, and then take a new examination for a pilot's license.

Reindeer Shipped To Canada

Stockholm.—A consignment of 300 live Swedish reindeer, the largest number ever exported at one time, has been shipped to Canada through a Norwegian port.

CONSERVATIVE LEADER IN SENATE

Senator W. B. Willoughby, of Moose Jaw, on Feb. 8, was elected Conservative leader in the Senate at a caucus which was held in the capital.

May Create Another Province

Teeth Province In Northern Area May Be Solution

Edmonton.—That the Dominion Government could scarcely be expected to extend the boundary of any one of three prairie provinces—Manitoba, Saskatchewan or Alberta—without dealing with all three and also with the whole of that area now administered by the Dominion as the North West Territories, was the statement of Premier J. E. Brownlee in the Legislature here.

The Premier said that while he did not wish to directly quote any person, he had gathered while in Ottawa that the disposition of the Dominion Government at present was rather to create another province from the territories than to divide them up between the other provinces.

The Premier said he was not inclined to take the reports of Saskatchewan's efforts in this direction seriously.

Quota System For Canada

Advocates Restriction Of Immigration To The Dominions

Ottawa.—A quota system for immigrants entering Canada is advocated by Hon. J. W. Edwards (Conservative, Frontenac-Addington).

Dr. Edwards, in a resolution placed on the order paper of the House of Commons, seeks approval of his opinion that "immigration to the Dominion of Canada should be restricted by the adoption of a quota system which, however, shall not be applied to the British Isles and the United States of America and from which certain specified countries may be practically exempt."

Irish Minister To Germany

Dublin, Irish Free State.—The first minister of the Irish Free State to Germany will be Prof. D. Binchy. He is a member of the faculty of the National University of Ireland. It is the intention of the government to appoint a minister to Paris soon.

Pirates!

No sailor, however, would be much alarmed if these pupils of Mary Pickford were at large upon the main. This bold band group featured the second program at the Sea Music Festival recently held at the Vancouver under the auspices of the Canadian Pacific Railway.

Starts New Exploration Flight

Byrd Expedition Reports Important Discoveries At South Pole

New York.—The New York Times, The St. Louis Post-Dispatch and their associated newspapers have received a delayed dispatch from their correspondent with the Byrd Antarctic expedition telling of a new exploration flight begun by Commander Byrd over King Edward VII. Land to the south of the mountains he discovered recently.

The flight was being made with two planes, a Fokker in which were Commander Byrd, Bernt Balchen, pilot, and Lloyd Berkner, radio operator, and in the other Captain Park, Jr., Harold June, pilot and navy radio operator.

The correspondent's brief dispatch was sent by dog team from Little America, the Byrd headquarters ashore, to the barque City of New York at the ice barrier, for transmission by wireless.

At the time it was sent the correspondent reported wireless messages coming from the planes showed that the flight was still in progress and already had been productive of important discoveries, which would be made known when the planes returned to their base.

Will Discuss Resolution

House To Debate Matter Of Binning and Loading Of Wheat

Ottawa.—The unloading and binning in public elevators of certain grades of wheat is the subject of a resolution placed on the order paper of the House of Commons, by T. L. Donnelly, Liberal, Willow Bunch.

Mr. Donnelly proposes that "the grades of wheat known as Nos. 1, 2 and Northern, and 4, 5 and 6 wheat billed to terminal points should be unloaded and binned only in public terminal elevators, under such regulations as will prohibit mixing of the grades either in the elevator or when being loaded into boats or cars, or in transit for milling or export." The matter will come up for discussion in the House shortly.

Ramsay MacDonald

Is Feeling Fit

Denies Reports That He Is Suffering From Falling Health

London, Eng.—Right Hon. Ramsay MacDonald, Labor Leader, has denied a report that he was finding his political responsibilities too heavy. It had been suggested that the Labor chief was in failing health.

He declared that as a matter of fact he was perfectly fit and was putting on weight.

Will Meet In London

London, Eng.—The Marchioness of Aberdeen and Tennant, who is president of the International Council of Women, is calling a conference of rural women to meet for a fortnight, in London, from April 30 to May 11, 1929. An appeal is being made especially to Canada to send some representative rural women—this because Canada is the pioneer in organizing rural women.

PAYS TRIBUTE TO LEAGUE OF NATIONS' WORK

Ottawa.—"There is no royal road to peace, but there are many paths which lead in the direction of peace and the Briand-Kellogg treaty is one of these paths," Premier King said during the House of Commons debate on the Kellogg-Briand pact.

Premier King paused at this moment to pay tribute to the work of the League of Nations towards peace. Touching upon disarmament, Premier King said it was true that progress toward disarmament had not been as great as one would like, but considerable progress had been made. The pact created a solemn covenant binding nations not to go to war as a means of settling differences.

The Senate of Canada has already ratified the pact.

Mr. King sketched briefly the history of the treaty, which he said, had now been accepted by 62 nations. Its fundamental origin was "to be bound in a feeling of revolt against war on the part of all nations which have had to do with war in the recent past."

The treaty did not pretend to establish machinery for the prevention of war, but it called forth from the nations of the world "a solemn renunciation of war as an instrument of national policy."

The League of Nations did not include within its membership all the nations of the world, said the prime minister, in pointing out some of the advantages of the treaty. The United States was not a member of the League of Nations, but it had signed the treaty for the renunciation of war. One or two other countries were in the same position.

Support of the treaty, coupled with a note of warning that there must be disarmament if peace is to be more than a dream, was the burden of the speech with which Hon. R. B. Bennett, Conservative leader, followed Mr. King.

Rationing Bread In Russia

People Are Using It To Feed Hungry Cattle

Moscow.—Bread books issued by the government will govern purchase of bread after March 15, the Moscow Soviet or governing committee has decided.

The committee, which acts when the Soviet is not in session, was ordered in a resolution to work out details governing the distribution of bread under the new order.

The resolution, after stating that the red capital was amply supplied with baked bread, went on to say that the main difficulty lay in speculation and in feeding cattle with bread which was cheaper than fodder.

Supplies For H.B. Terminals

House Told \$210,570.38 Was Spent In Halifax During 1927

Ottawa.—A sum amounting to \$210,570.38 was spent in Halifax by the department of railways and canals and the department of marine and fisheries in 1927 in connection with the activities in Hudson Bay. This was disclosed in a return tabled in the House of Commons in answer to a question by W. A. Black (Cons., Halifax). It was shown that the railway department spent \$39,333.96 with Halifax firms for supplies on account of the Hudson Bay terminal. The marine department bought \$10,721.99 worth of materials from A. S. MacMillan for the Hudson Straits Expedition, and \$139,511.43 worth from other firms in the way of supplies.

Will Visit Saskatoon

Saskatoon, Viscount and Lady Willington will pay an official visit to Saskatoon, April 1, according to notification sent to Mayor Norman. Plans will be made to give the visit royal party a rousing reception.

Early Lodge Dead

Saskatoon, Eng.—Lacy Lodge, wife of Sir Oliver Lodge, the noted scientist and research worker in physical fields, died recently at their home near here. Sir Oliver was at her bedside.

MANY NEW SCHOOL DISTRICTS ARE ORGANIZED

Fifty-six new school districts were organized in Alberta during 1928, bringing the total number of districts in the province up to 3,497. The enrolment of pupils during the year shows a gain of 4,766 and the total enrolment is now approximately 160,000. Eighty-one new one-room schools and thirteen new two-room schools were built in country and village districts.

An outstanding feature of the report of the Department of Education is the marked increase in the number of students enrolled for technical education, enrolment in the Institute of Technology at Calgary having reached a total of 1,745. Approximately 500 new students were enrolled during the year for correspondence courses. Over 1000 more pupils wrote the departmental examinations than in any previous year. In the high school grades, their success is shown by the fact that of all the units written, 75.19 per cent were passed successfully.

Mary: What's the matter with Frank?

Betty: Eye strain. He fell in love with a chorus girl and couldn't afford anything better than a gallery seat.

...

My wife's made an awful discovery. And so will agree it's the worst. She learned I get paid on the 15th. The same as I do on the first.

NOTICE OF SALE

Carbon Alberta, February 12, 1929
The following animal will be sold by public auction on Saturday, March 2nd 1929, at 2.30 p.m., in accordance with the provisions of The Livery Stable Keepers Act, Chapter 107 of The Revised Statutes of Alberta, 1922.
Description of Animal—One bay gelding, age 10 yrs. Amount of Lien is \$46.45. Owner, Edmond F. Archambault. Seller, W. Leitch, Carbon Alberta.

The Battle of January:

January was a momentous month for wheat producers the world over. Canadian farmers had delivered nearly four hundred million bushels of wheat. Argentine and Australia were commencing the delivery of unusually large crops. There was an immense visible supply of wheat, the market commenced to sag. The one optimistic feature in a rather gloomy picture was the Canadian Wheat Pool. Just what the Pool stood for is told in candid language by George Broomhall, the British grain authority in "Milling."

"Prices were put down on the plea that Argentina must sell more of her new crop, and, in fact, shippers did put out lower offers, and some Canadian sellers followed the downward lead.

"But it was soon found that the Canadian Pool refused to offer or sell at the lower prices, and, of course, this gave Argentine shippers courage to work for a reaction.

"The action of the Canadian Pool also gave buyers confidence, and they not only found they needed wheat, but that they could pay better rates for it.

"As long as sellers were willing to 'cut' prices, buyers were quite prepared to stand back and let them do still more 'cutting,' and quite possibly there might have been a bad slump had not the Canadian Pool taken a strong stand.

"The Canadian Pool Managers

certainly deserve credit for courageous handling of a difficult situation, and their action proves that farmer members of the Pool would not agree to low prices at this period of the season.

"The lesson of the price movements of wheat in the past week is that emphasis must be given to the power of strong holders to maintain prices.

"Past experience showed that a crowd of weak holders was almost at the mercy of buyers in times of plenty.

"I think all must now recognize the commanding position of the Canadian Pool, and the readiness of Argentine shippers to follow a strong lead."

Alberta Wheat Pool

Making Movies of Mountains

Looking down into Lakes in the Clouds near Lake Louise. Right, Ernst Lubitsch directs the action. Left, Barrymore and Camilla Horn.

The joke is on John Barrymore. Under the direction of Ernst Lubitsch, he, Camilla Horn, Mona Rico and several other screen celebrities were to spend three weeks at Lake Louise in the production of an alpine picture "King of the Mountains". With him he took a carload of Hollywood snow. This was fine business for the railway companies, but almost worse than carrying coals to New Castle as the party discovered when, from their windows in the Chateau Lake Louise, they looked across the lake to where Victoria Glacier hangs with crystal splendour the year round. High up on the mountain side, a short saddle ride from the Chateau they found plenty of snow, and here Mr. Barrymore is said to have amazed the professional Swiss guides by his daring. In portraying the role of a daredevil mountaineer he scorned the use of a double and sprained both his ankles. Hobart Bosworth and Victor Varconi support Barrymore in the picture staged at Lake Louise.

John Barrymore is one of the few Americans to hold a Swiss Government certificate for the climbing of Mont Blanc. He therefore knows whereof he

speaks when he says that the Canadian Rockies, for beauty, charm and thrills may not be surpassed.

During the past few years quite a number of moving picture companies have "discovered" the Canadian Rockies. With headquarters say at Banff or Lake Louise they are within easy distance of almost every scenic background which might be desired. The low rolling foothills give the color for the cowboy variety. Somewhere, although perhaps high up, snow can always be found. The myriad lakes, streams and waterfalls, high cliffs and rugged trails, the motor roads and the railway, pack-ponies, dogs and wild life, the peaks and pine-clad valleys bridges and tunnels provide varied properties in proximity obtainable in few other locations on the continent. Many of the thrillers one sees now were filmed in the Canadian West and with the establishment of a Canadian film production company at Calgary, a Canadian Hollywood is in a fair way to becoming built up, particularly as the long hours of sunshine and the clear atmosphere for which Banff is famous are two of the major essentials for successful camera work. The Banff Winter Carnival also provides a splendid background.

HOW ABOUT YOU?

It is easy to criticize leaders and public officials who are trying to accomplish highly important civic work. Each of us should ask a self-directed question. Here are a few questions that Carbon fault-finders should ask themselves. During the past year, what have "I" done to help Carbon? How many meetings in relation to civic problems have I attended? On how many committees have I served to help this community in its civic, industrial and commercial affairs? Have I stood on the street corners, or occupied a seat in a bumper's joint, (and Carbon has bumper's joints) and criticized, or have I aided in solving problems to help bring about remedies to improve conditions? Have I really tried to understand what this town is facing in regard to its future growth, and the prosperity and happiness of its people? Have I cared? Have I seen any higher than my own counter or looked any further than the pavement in front of my home or place of business? Have I been holding back and letting the other business men in town do all the advertising to stimulate business, and I do nothing but reap the benefits of their efforts to bring trade to town? Why should I not realize and resolve to do my share of the boosting of the community? These are the real tests of good citizenship. How do they find you?

WHAT'S YOUR CHOICE?

"We take liquor advertisements for the same reason that we take mail order advertisements—because it pays the advertiser and it pays the newspaper," says The Enderby Commoner. In the same issue is to be seen an advertisement from a Winnipeg mail order house which probably returned as much revenue as all the other display advertisements in the Commoner.

The community newspaper is expected to give community service and those who demand most are the least likely to give their local paper the most help. The Commoner has found itself in a similar position to a few other papers. The local merchants will not give it the necessary support and it is, therefore, compelled to go outside, a situation, we feel sure, The Commoner did not find congenial.

Other papers have had similar offers and can obtain such advertising almost and time. Merchants do not realize how much country newspapers sacrifice in order to protect home buying nor do they appreciate the fact that without that same little weekly their town would soon descend to the hamlet class.—Pentleton Herald.

Advertising Pays!

No, You.
Try It.

Gert—Did you get your husband a surprise on his birthday?

Sadie—I'll say I did. You never saw him so surprised in all his life.

Gert—What did you get for him?

Sadie—His breakfast.

CHRONICLE ADS. PAY

Here and There

245

In 1921 the Canadian Pacific paid out \$2,000,000 from freight revenue in loss and damage claims. In 1927 it paid \$700,000, a decrease of \$1,300,000, although in the same period the gross freight revenue had increased by \$15,000,000. Better freight handling did it.

The stonework and most of the partitioning of the Royal York Hotel have been completed, and there appears every likelihood that the great building will be open to the travelling public by June 1. This hotel is the largest and tallest in the British Empire.

Some idea of the world-wide area over which the Canadian Pacific operates may be gathered from the fact that in making out its monthly balance it is necessary to turn fifty-nine different foreign currencies into dollars in order to get an accurate result in Canadian money.

Wireless is now being used to aid in the protection of forests against fire. The Ontario Provincial Government planes are equipped with the latest apparatus with a radius of 400 miles, so that the headquarters may be readily communicated with and immediate steps taken upon the discovery of an outbreak.

"The principle of rapid freezing has such qualifications that there seems to be little room for doubt that it is going to revolutionize the fishing industry," stated W. A. Found, deputy minister of fisheries. "We intend to make the experimental station at Halifax of the utmost value to the whole industry."

W. J. C. Madden of Calgary, is making arrangements with the Canadian Pacific Express Company for the transportation of whitefish caught in Great Slave Lake from Edmonton to Chicago. It is intended that the distance from the fishing ground to rail head will be covered in winter by five-ton trucks operating upon the thick ice of the Slave and Athabaska Rivers, traversing country that would otherwise be difficult to cross.

A new and strange form of wildfowl is being imported into Alberta by the Calgary Fish and Game Association, which has arranged to secure 2,000 Mongolian and Chinese ring-necked pheasants. The birds are to be liberated this summer throughout the southern part of the province, where 1800 were placed last season as part of the Game Association's plan for re-stocking Alberta's game bird supply. With all these Oriental birds loose the ancient Yellow Peril seems more imminent.

Cupping as much as an hour and a half off her schedule eastbound, and half an hour westbound, the Trans Canada Limited, crack flyer of the Canadian Pacific Railway running between Montreal, Toronto, and Vancouver, will be further remarkable this summer by reason of a "solarium" car, containing baths and a special sun-room, that will be included in her luxurious equipment. The Mountaineer, another speedy summer train, running between Vancouver and Chicago will also have "solarium" cars, and run on faster time. The Trans Canada makes its first run on May 12, and The Mountaineer on June 10. The former train makes 14 trips during the summer season covering a distance equal to about fifteen and a half times round the world.

Track Would Direct Planes and Steamers

Engineer Says Charged Wire Strung Along Channel Would Provide Safety

An electric "track" has been developed over which steamships, dirigibles and airplanes could "run" and be absolutely indifferent to the dangers of fog, thick weather and perilous harbors' channels, Robert H. Marriott, newly-appointed consulting engineer to the Federal Radio Commission, told electrical engineers who came from all parts of the United States to attend the winter convention of their society at the Engineering Societies' Building, New York.

The "track" which would keep steamers and aircraft from going astray in thick weather consists of a cable charged with electricity, laid down the middle of a harbor channel, or in the case of aircraft, stretched on poles like a telegraph line from one city to another, under the regular airway.

AFTER EFFECTS OF DREADED INFLUENZA

Overcome By the Use Of Dr. Williams' Pink Pills

Throughout Canada influenza prostrates thousands of busy men and women every winter, wrecking their health and leaving behind numerous serious ailments. It is the after effects of influenza that cause such widespread misery. Here is the reason. Influenza impoverishes the blood; shatters the nervous system and renders its victims liable to rheumatism, indigestion, neuralgia and other nervous disorders. You can avoid the influenza by keeping the blood rich and pure with Dr. Williams' Pink Pills, or if because you have not recognized your blood weakness the trouble fastens its fangs upon you, its disastrous after effects can be driven out by the same remedy. Dr. Williams' Pink Pills increase and enrich the blood, feed the starving nerves and thus impart new health and strength to enfeebled men and women.

Here is proof of the power of Dr. Williams' Pink Pills to banish these disastrous after-effects of influenza. Mrs. W. J. Radford, R.R. 5, Belleville, Ont., writes:—"I can recommend Dr. Williams' Pink Pills because they put me on the road to health after other medicines had failed. I was in a bad condition after an attack of influenza and my friends thought that I would never get well. I tried remedy after remedy without relief till my mother begged me to try Dr. Williams' Pink Pills and got me a supply. I began using them and before they were all gone I could see they were helping me so my husband bought a further supply. I continued taking them for some time and they fully restored my health. Naturally I am always ready to recommend them to other sufferers and I never lose an opportunity to do so."

You can get these health-renewing pills through any dealer in medicine or by mail, post paid, at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Some of England's finest Bees come from the Orkney and Shetland Islands, where seaweed forms a large part of the sheep's foodstuff.

Minard's Liniment for Coughs and Colds.

Elm trees around a field are sometimes cut down because they drain strength of the soil.

"EVERYTHING SHIP SHAPE"

No, it's not a Paris stage scene. It's just an interior view of the giant Cunard liner "Berengaria" when some of England's leading stage people were guests aboard the Cunarder recently, and were royally entertained by brightly dancing girls. This line, founded by the Canadian, Sir Samuel Cunard, operates a score of such floating palaces between British and Canadian and American ports, with economical quarters for the stream of settlers to the Canadian farm lands.

PROOF OF DYES is in the dyeing!

Words won't dye a dress, or coat, or sweater. It takes real anilines to do that. That's why Diamond Dyes contain from three to five times more anilines than any other dye—by actual test.

It's the anilines in Diamond Dyes that do the work; that give the colors such brilliance; such depth and permanence. It's real aniline that keeps them from giving things that re-dyed look; from spotting or streaking.

Next time you have dyeing to do, try Diamond Dyes. Then compare results. See how soft, bright, new-looking the colors are. Observe how they keep their brilliance. Your dealer will refund your money if you don't agree. Diamond Dyes are better dyes.

The white package of Diamond Dyes is the original "all-purpose" dye for any and every kind of material. It will dye or tint silk, wool, cotton, linen, rayon or any mixture of materials. The blue package is a special dye, for silk or wool only. With it you can dye your valuable articles of silk or wool with results equal to the finest professional work. When you buy—remember this. The blue package dyes silk or wool only. The white package will dye every kind of goods, including silk and wool. Your dealer has both packages.

SUNDAY SCHOOL LESSON

MARCH 3

THE CHRISTIAN CHURCH

Golden Text: "So we, who are many, are one body in Christ."—Romans 12:5.

Lesson: Matthew 16:13-20; Mark 4:26-32; Romans 12:4-8; Ephesians 1:15-23; 2:13-22; 4:4-6, 11-16; 5:22-27; 1 Timothy 3:15.

Devotional Reading: Ephesians 4:11-16.

Explanations and Comments

The Christian Church is a Growing Church, Mark 4:26-32.—And Jesus said, "So is the Kingdom of God," that is, what you see to be God's method of working in Nature is also His method of working in the spiritual realm. The parables of Jesus show us that the term "the Kingdom of God" has to do with man's spiritual nature and possibilities, his inner life; it is the reign of God in the hearts of men. The Kingdom of God is as if a man should cast seed upon the earth—as Jesus and the apostles and His later followers have implanted the word of God in the hearts of men. After having sown the seed, the planter sleeps by night and rises by day; that is, he leads his customary life and leaves the result of the sowing with God. And the seed springs up and grows, he knoweth not how.

One of the most effective vermifuges on the market is Miller's Worm Powders. They will not only clear the stomach and bowels of worms, but will prove a very serviceable medicine for children in regulating the infantile system and maintaining it in a healthy condition. There is nothing in their composition that will injure the most delicate stomach when directions are followed, and they can be given to children in the full assurance that they will utterly destroy all worms.

Protect the child from the ravages of worms by using Mother Graves' Worm Exterminator. It is a standard remedy, and years of use have enhanced its reputation.

Regular night flights for the benefit of tourists are now being made over Hamburg, Germany.

A "Tramp" Aeroplane

A "tramp" aeroplane has successfully undergone its trial flights in England. Having a spacious cabin resembling a railway luggage van, the huge machine can be used as a freight carrier, for the transport of troops, or as a long-distance bomber.

Muscular Rheumatism Subdued.—When one is a sufferer from muscular rheumatism he cannot do better than to have the region rubbed with Dr. Thomas' Electric Oil. Let the rubbing be brisk and continue until ease is secured. There is more virtue in a bottle of it than can be fully estimated.

New Patient—And is your treatment completely successful?

Nerve Specialist—My dear sir, it's so successful that only last week one of my patients tried to borrow five hundred dollars from me.

It May Be Urgent

When your Children Cry for It

Castoria is a comfort when baby is fretful. No sooner taken than the little one is at ease. If restless, a few drops soon bring contentment. No harm done, for Castoria is a baby remedy, meant for babies. Perfectly safe to give the youngest infant; you have the doctors' word for that! It is a vegetable product and you could use it every day. But it's in an emergency that Castoria means most. Some night when constipation must be relieved—or colic pains—or other suffering. Never be without it; some mothers keep an extra bottle, unopened, to make sure there will always be Castoria in the house. It is effective for older children, too; read the book that comes with it.

CHAPTER XIV.—Continued.

Donald stirred as Andy applied the water, and his one good eye opened slowly. "Did I win?" he questioned weakly.

"You bet your blinkin' life you did. When Donald's gaze rested on Connie his face twisted into a wry smile. He reached for her hand and held it in a firm pressure. "Good little sport," he whispered through split lips.

Connie felt as though her heart would burst. Scorching tears ran down her face, and it was with the utmost difficulty that she controlled the suffocating sobs that filled her throat.

The sound of the big mill whistle smote their ears in a wild melody of short, sharp blasts, quite unlike the decorous tone that summoned and dismissed the men.

"What's that?" asked Donald, attempting to sit up.

"The engineer is celebrating, Donnie. The men 'ave returned to work. The strike is broken."

"Ah!" sighed Donald happily as he fell back on the pillows.

The distant hum of a gas car gradually increased to a series of staccato explosions, then died off suddenly. They heard the light rumble of wheels as it drew to a stop at the station below. There was the sound of quick foot-steps on the board sidewalk and the door opened to admit Dr. Paul. He crossed the room and took Donald's hand, "Is it true," he asked incredulously, "that you whipped Ole Hand?"

"Strike me pink if 'e didn't," Andy vouchsafed.

"I have patched up Hand's victim's many times," the doctor stated, "but this is the first time that I have attended his victim, and I can assure you that it's a pleasure." He removed his coat and rolled up his sleeves. "I'll look you over," he added, then glanced significantly at Connie, who rose and left the room.

"A couple of cracked ribs, a fractured ulna, and a few hundred bruises," was the doctor's verdict a few minutes later.

The physician's deft hands soon bandaged the broken ribs and set the bone of the forearm.

"I'll go and patch up the fallen bully. I hope he's worse still," he chuckled as he left the room.

HELPED DURING MIDDLE AGE

Woman Praises Lydia E. Pinkham's Vegetable Compound

Sarnia, Ont.—"I am willing to answer letters from other women, to tell them the wonderful good Lydia E. Pinkham's Vegetable Compound did me. I cannot be thankful enough for the benefits I received during the Change of Life. I do housework and my troubles made me unfit to work. A friend advised me to try the Vegetable Compound. I felt great relief at once, began to regain my appetite, and my nerves got better. I will recommend your medicine to all with troubles like I had."—Mrs. JOHN BENSON, 162 N. Christina St., Sarnia, Ontario.

W. N. U. 1774

Andy stepped to the door and called in Connie.

"Don't look so frightened, Connie," smiled Donald. "I don't feel half as bad as I look."

"I'll have to go now," she said in a voice choked with emotion.

Andy accompanied her outside the door. "Ave a bite to eat, Connie?" he invited.

Connie shook her head. Now that the excitement was over, the strain of the emotion she had experienced showed in the dark shadows under her eyes and in the droop of her slight shoulders. "Andy," she began as she placed a small hand on his arm, "you—you won't say anything what—what—I—"

A flood of rose dyed her tanned cheeks and her blue eyes fell in embarrassment. Andy patted her shoulder reassuringly.

"I'll never s'y a blinkin' word, Connie; an oyster's got nothin' on me."

Connie, visibly relieved, picked up her gun and started up the hill. Andy watched the pathetic little figure until she disappeared in the woods. For a moment he stood staring into nothingness, then, shaking his head sadly, he entered the cabin.

"She's a little brick, Andy," Donald spoke weakly from his bed.

Andy glared at him. "Brick!" he repeated sarcastically. "Is that all? You big, bone-headed, blinkin' boob!" He slammed the door as he went out to give emphasis to the remark.

"What the devil does he mean?" puzzled Donald. He turned painfully to his side, yawned equally as painfully, then fell into a sound sleep.

CHAPTER XV.

On the third day of Donald's convalescence he was able to leave his cabin. With his arm in a sling, his face patched with plaster, he made the rounds of the mill.

The men welcomed him with eager nods and smiles, many coming forward to shake his hand in silent respect. The big plant was now going at full blast. Belts flapped, logs thudded, planers snored loudly, and the great saw ripped shrilly through the big logs in a raising crescendo of sound.

Down at the sliding an engine bumped noisily into a long string of flat-cars piled high with lumber. With arms akimbo, his wet undershirt clinging to his powerful torso, the mop of blond hair hanging damp on his brow, Gillis stood surveying the heavily-laden cars with an air of complacency. The lumber handlers sat about in positions of weariness, mopping their hot faces.

Gillis smiled cheerfully as Donald approached.

"Good news for you, Donnie," he said.

"What is it, Jack?"

"Last load for the big steamer," replied Gillis, as he pointed at the moving train.

"We're on time, then," cried Donald gladly.

"One day ahead," corrected Gillis.

The engineer came to the cab window as the engine passed, and pantomimed his congratulations by shaking hands with himself. The train gathered speed, and as the caboose rattled by, the conductor came to the rear platform.

"Good work, boys!" he shouted.

They stood watching the train until it struck the down grade and disappeared through the cut.

"Well, that's over," observed Gillis, as he sat down heavily and wiped the sweat from his face. He looked tired and worn, but the light of victory shone in his eyes.

"If it hadn't been for you, Jack," said Donald earnestly, "we would not have got that order away on time. You look all in; you'd better have a good sleep."

The big man's eyes brightened at Donald's praise.

"You don't look like you'd bin to a Sunday school picnic," replied Gillis with a chuckle.

As Donald walked up the hill the whistle blew for the noon-hour, and the men trooped past on their way to the dining-room. Blackie left the ranks and walked shamefacedly to Donald's side.

"I'm sorry for the part I took in the strike, boss, I—"

"It's all right, Blackie," interrupted Donald, "you more than made up for it. We'll forget all about that."

Blackie's face wore a relieved look as Donald gave his hand a friendly grip.

Meals in logging camps are eaten in silence and with a fixity of pur-

pose. It is a business to be finished with as hurriedly as possible. From the time the men are seated until the chairs are pushed back, the clatter of dishes and an occasional "pass the butter" are the only sounds.

As Donald moved to his place at the table the men arose and clapped their hands. Someone called for a cheer, but Donald laughingly held up his hand.

"Men, I can't find words to tell you how much I appreciate your good work. Your long hours of labor enabled the Company to get an important order away on time, thereby saving their prestige in a big Eastern market. You will receive double pay for every hour you worked during the week."

A low murmur of applause followed this welcome announcement.

After lunch, feeling the need of exercise, Donald made his way slowly down the hill. The severe mauling and the days in bed had weakened him to such an extent that he was forced to take frequent rests. As he turned a curve in the trail, Hand and the man with whom Andy had fought crawled stealthily from the bush, looked furtively about them, then followed Donald down the hill. He reached the open glade by the fairy nest to find Connie seated by the rippling stream, her chin resting in cupped hands, and staring dreamily into the flashing water.

"Ah!" he cried gaily, "I have caught my little dryad at her orisons."

At the sound of his voice Connie sprang to her feet, her heart racing madly. Hearing a sound behind him, Donald turned to find the eyes of the Breed fixed on him in a malignant glare that chilled him to the marrow. For a short interval the dusky orbs of the Indian held his as though with a hypnotic power.

"Whew!" he ejaculated, as the Breed hobbled down the trail, "your guardian sure does give me an awful look. Why does he hate me, Connie?"

"Joe has peculiar ways," she parried.

"What were you dreaming about, Connie?" he asked interestedly.

A gay light danced momentarily in her shining eyes, and the red lips curved in a smile; "I was dreaming I was rich," she archly confessed.

"An old, old dream," smiled Donald as he stretched himself painfully on the moss.

Connie sat down near him.

As always, this spot gave Donald a restful feeling. The gentle zephyrs wafted from the woods about them were so merrily delicious and the sparkling glacial stream that rippled through the glade sang its clear, sweet song. He closed his eyes wearily.

The proximity of the man she loved, lying there with his arm in a splint, his handsome face still bearing the marks of the blows he had suffered in her defence, thrilled Connie to the depths of her warm, impulsive heart. An almost overmastering desire to touch his hair possessed her.

"What would you do if you were rich, Connie?" he queried drowsily.

Connie sank back in the delicious moss and clasped her hands behind her golden head. "I'd buy a big trunk—one of that kind with the bulgy top—and I'd fill it with silks, satins, brocades, velvets and all kinds of soft frilly things. Then I'd unpack it slowly one by one and hang them up all around the room and sit down and look at them. I'd buy a great, big stone house in London, and I'd walk down the wide marble stairs, trailing a long rustling silk gown, and I'd raise my lorgnette to my eyes and say, 'James, have my carriage at the door in half-an-hour. I'd have a country place in Scotland, with hundreds of dogs and horses,

thousands of birds, and acres of flowers."

She paused for a moment.

"I'd take Dad and Peggy with me everywhere I'd go," she went on softly, "and I'd buy Dad millions of books, and for Peggy I'd buy a solid gold-mounted bridle, and lots of warm blankets for winter instead of those old sacks. I'd buy lots of good things to eat, and lots of good clothes for all the poor kiddies in the world."

She looked up at the hills. "And six months out of every year," she continued, "I'd live right here in these mountains and come every day and sit beside—beside—this stream."

She raised herself slowly and looked down at Donald as he lay with closed eyes. Leaning forward until her golden curls almost brushed his dark hair, her eyes rested on a purple bruise on his brow. "And," she finished fiercely, "I'd kill every man like Ole Hand."

Donald laughed sleepily.

"Connie, you are a dear little girl," he said tenderly.

The endearing tone held a paternal ring, and Connie bit her lip in vexation.

"I'd like to have your father go with me to Vancouver some day. Will you go?"

(To Be Continued.)

Guard Against FLU — Sore Throat The First Warning.

Few families will escape. This epidemic constitutes a real danger. Health authorities everywhere warn the public of the danger of the common cold. "Flu" usually starts with Sore Throat. Unless the germs are killed by some antiseptic treatment a serious malady may develop.

A simple treatment is to gargle the throat three times daily with Nerviline. The antiseptic properties of Nerviline quickly destroy the germs in the throat. Of course if the chest is sore Nerviline should be rubbed over the affected area—lots of rubbing—it can't burn a blister, but will bring out the congestion and break up the cold.

To prevent "Flu" or colds from gaining headway Nerviline will prove most effective. It is hardly necessary to point out that the bowels should be stimulated, and the system purged of all waste materials. For this purpose Dr. Hamilton's Pills are recommended. They act without griping or discomfort of any kind. This combination treatment of Nerviline and Dr. Hamilton's Pills will prove a very satisfactory prevention for Grippe, Flu, etc.

WINDOLITE

MADE IN ENGLAND

The Improved Glass Substitute

COMES WITH A MESSAGE OF HEALTH

WINDOLITE stands for 100 per cent. sunlight. It makes light but strong windows for cattle sheds, dairy stables, poultry houses, brooders and all out buildings. It is economical, unbreakable, flexible and is easy to cut and fit. It is now being successfully used for sunrooms, verandahs, schools, factories, hospitals, sanitariums, hot beds, plant coverings and greenhouses. It keeps out cold—will not crack or chip—cuts with an ordinary pair of scissors and is easy to fit. WINDOLITE is supplied in rolls any length but in one width of 36 inches only. A square yard of WINDOLITE weighs about 14 ozs., while a square yard of glass of ordinary thickness, weighs about 135 to 150 ozs. The improved WINDOLITE requires no varnish. WINDOLITE is made in England.

Price \$1.50 Per Square Yard, f.o.b., Toronto.

MINERALS FOR POULTRY**

(By Alex Taylors Hatchery)

We think of feed primarily in the production of eggs, and sometimes forgetting however that the eggs are composed of 65 per cent water. A liberal intake of water will increase egg production by stimulating feed consumption and giving the necessary for egg formation. Warm water is one of the primary essentials of winter egg production. When the flock goes off feed in a cold spell, egg production drops considerably. This is caused by the water being too cold, or none at all. Give your hens lots of warm water and have them produce eggs when prices are high. Over one third of the solid part of a hen's egg (that is one-third of all the egg except the water it contains) is composed of two minerals—lime (calcium) and phosphorus. They are found in very small amounts in most farm feeds. The other two-thirds are made up chiefly of carbon, nitrogen and sulphur, these minerals being abundant in your ordinary feeds.

Poultrymen have long known the importance of lime for egg shell and know the need of phosphorus in producing eggs. Oyster shell, this natural mineral feed is produced from vast deposits of lime and phosphorus in the exact proportions suited for poultry needs. Oyster shell is free from conglomeration of chemicals or drugs. It is a food and should be used as such. Use Oyster shell in your poultry mash and feeds, it builds up bones in your young chicks, develops large frames for heavy egg layers, supplies the needed egg producing material and makes hard-shelled hatchable eggs. Mix 5 lbs to every 100 lbs. of mash. Have a supply of Clean Oyster shell in your hopper at all times.

**Who Does Your
Printing?**

All business houses need more or less printed matter, all of which is within the possibilities of the local printer. Yet how prone many are to pass up the home printer and let the orders go to city offices which have no interest whatever in rural communities except to get printing orders and the cash to pay for them. Business men, remember that the home paper is constantly promoting the interests of the home community and you owe it to yourself and your local paper to back up these efforts by at least having your printed matter done locally.
